The Objective for the Product Detail dashboard is to show performance for a specific product

Add a page-level **Slicer** for **Product Name**

Add a **Gauge Chart** filtered by the **Latest Start Of Month** to show **Total Profit VS Profit Target**

Add a **Gauge Chart** filtered by the **Latest Start Of Month** to show **Total Revenue VS Revenue Target**

Add a **Gauge Chart** filtered by the **Latest Start Of Month** to show **Total Transactions VS Transaction Target**

Add a **Area Chart** to show **Total Profit** on the Y-axis and **Date Hierarchy** on the X-Axis

Add a **Area Chart** named **Return Trending** to show **Total Returns** on the Y-axis and **Date Hierarchy** on the X-Axis

Create a **field parameter** called **Product Metric Selection** to be connected to the **Return Trending Area Chart** and make it more dynamic. The **Product Metric Selection** includes **Total Revenue**, **Total Transactions**, **Total Profit**, **Total Returns** and **Return Rate**
